

Department of Defense (DoD) Federal Acquisition Regulation Supplement (DFARS)

June 2008

Recent changes to the Department of Defense (DoD) Federal Acquisition Regulation Supplement (DFARS) clause 252.225-7014, Preference for Domestic Specialty Metals and its Alternate I, state the need of full compliance with the sourcing requirements of acquisitions of specialty metals associated with subcontracts under DoD prime contracts for aircraft, missile and space systems, ships, tank-automotive, weapons and ammunition.

Crydom products (Crydom and Crouzet brands) **do not use** any specialty metals, therefore our relays are not subject to this requirement.
