**DIRECTIVE 2002/96/EC OF THE EUROPEAN PARLIAMENT AND OF THE
COUNCIL on Waste Electrical and Electronic Equipment (WEEE)**

In answer to questions regarding Crydom's activities relative to the WEEE Directive, we can state that:

Crydom is fully aware of the WEEE directive that came into force in January 2007, we understand its objectives and its scope.

Additionally after careful review of the legislation, specifically Regulation 2002/96/EC, Article 3 (a), Annex 1A and Annex 1B, it is Crydom's understanding that the products Crydom sells do not fall within the scope of this directive and are therefore exempt.

We remain at your disposal for further question you may have.

Sincerely,

A handwritten signature in blue ink, appearing to read "Oscar Rivera", enclosed in a thin black rectangular border.

Oscar Rivera
Engineering Director
Solid State Relays (Industrial Sensing)
Crydom Inc.
