

DRH series

Fierce performance for heating applications

These power enhanced 3-phase contactors combine all the advantages of a solid state design with the functionality and simplicity of an electromechanical contactor resulting in a superior design ideal for demanding heating applications.

Output terminals designed for an easy connection of multiple loads in parallel for a total of up to 20A @ 600 VAC

Multicolor LED input status and alarm indicator for easy installation and maintenance

Integrated fan for superior thermal performance

Built-in over-voltage protection

Optimized thermal design (patented) with incorporated over-temperature protection

Embedded output for high temperature alarm

Input control available in DC and AC voltage options

A bold and smart solution...

▶ ROBUST

Housed in the same compact DIN rail package as the innovative SOLICON DRC, the DRH Contactor features a higher continuous current rating ideal for switching resistive loads (heaters, lamps, etc.) as well as inductive loads. Additionally, DRH contactors provide high resistance to surge current (716 Amps).

▶ RELIABLE

The innovative design of DRH contactors features increased air flow due to an integrated fan allowing for greater power in a compact package. The internal over-temperature protection adds to the safety and reliability of this UL listed device.

Bottom view

▶ EASY-TO-USE

Its enclosed heat sink (patented) eliminates the need for protective earth connections, while the multicolor LED (Red, Green and Blue) provides clear indication of the status of the contactor during operation.

Order a DRH Series contactor according to your needs

Series	Function	Control Voltage	Switching Type
DRH	3P: Contactor	A: 90-280 VAC/VDC D: 4-32 VDC	Blank: Zero Voltage Turn-On R: Instantaneous Turn-On
	60	A	18
	Operating Voltage		Rated Load Current
	60: 48-600 VAC		18: 18 Amps (3 Controlled legs) 20: 20 Amps (2 Controlled legs)
