DIN RAIL OR PC MOUNTED PLUG-IN SOLID STATE RELAYS & SOCKETS "LIFEPLUS ED SERIES" PLUG IN SOLID STATE RELAYS

Crydom's new **"LifePlus ED Series"** of AC and DC Output Plug-in Solid State Relays are designed to replace industry standard 12 x 29 mm plug-in Electromechanical Relays. Crydom's proven Solid State Relay Technology offers substantial performance advantages over traditional EMR switching solutions in many applications including significantly greater life expectancy (>100 million operations), contactless high speed switching which eliminates contact bounce, arcing and resulting electrical noise, precise low power logic compatible control inputs, acoustically silent operation and high shock and vibration resistance.

Available in a SPST N.O. configuration, the **"LifePlus ED series"** offer output ratings of either 3 or 5 Amps rms at 24 to 280 VAC, or 5 Amps DC at 1 to 48 or 1 to 80 VDC, all at 40 °C ambient temperature. AC outputs incorporate Crydom's proven Back-to-Back SCR technology while DC outputs utilize high efficiency FETs, both technologies resulting in the lowest possible on-state power dissipation and high surge current ratings which makes the **"Crydom LifePlus"** an excellent choice for applications such as small Motors, Solenoids, Heaters and Lamps. Optically isolated control inputs available include 3 to 15 VDC, 18 to 32 VDC, 48 to 72 VDC, 18 to 36 VAC and 90 to 140 VAC.

Crydom's **"LifePlus ED Series"** are UL 508 recognized for general purpose, motor control and pilot duty applications, and compliant to IEC 62314 LC-A resistive and LC-B inductive application requirements. They are also CE certified to the IEC Low Voltage Directive and compliant to the IEC EMC directive.

"LIFEPLUS ED SERIES" DIN RAIL AND PCB MOUNT ACCESSORY SOCKETS

The **"LifePlus ED Series"** includes accessory sockets accepting the Crydom **ED Series** SSRs and industry standard 12 x 29 mm plug-in relay packages. One version socket fits standard 35 mm DIN rail while a second version is PCB mountable, allowing direct replacement of SPST N.O. EMRs in both type installations. Equipped with screws for wire termination and a positive latch for relay retention, the **"LifePlus ED Series"** sockets provide an easy means to install and utilize Crydom **ED Series** Solid State Relays.

Featuring all solid state construction, **"LifePlus ED Series"** SSRs and Sockets provide an excellent improvement in performance over traditional EMRs. For more information on **"Crydom LifePlus"** Series SSRs, contact the nearest Crydom Distributor, Representative or Local Crydom Sales Office, or visit our website at www.crydom.com.
